Infor CloudSuite | Infor FACTS
Infor LN/Baan | Infor M3
Infor SX.e | Infor SyteLine
Infor VISUAL

Fully Integrated eCommerce Experiences

*The Power of Your **Infor ERP** Meets a Sophisticated eCommerce Solution*

Integration with Your ERP Should be a Given, Not a Decision Factor.

When you choose an eCommerce solution you shouldn't have to think about recreating the wheel of information that already exists in your ERP. You have invested in your back office systems and your commerce environment should be able to leverage the information residing there.

Insite has built a powerful integration architecture and quick connectors to common Infor ERPs like SX.e and A+ so you can deliver a superior customer experience and increase the productivity of every person involved in the B2B buying cycle

A Powerful Integration Architecture

It is imperative that the data flow between your eCommerce and ERP systems are in sync for business rule enforcement and automation of order processing. Insite's standard integration architecture leverages the Infor ERPs critical data and order constructs. Pre-established integration modules enable a quick-to-market implementation, helping you deploy a fully-integrated eCommerce site with robust functionality.

Key Highlights of Insite's Standard Connectors

- Configure the bi-directional flow of data between InsiteCommerce® and your ERP through the robust Admin Console
- Utilize refreshes, submissions and real-time calls depending on data type
- Support inventory, availability, taxes, order submission, credit card validation and more

Wholesalers Running Infor SX.e

Wholesaler Running Infor A+

“Our customers were comparing us to big box stores, expecting a high level of functionality for the ordering and delivery of our products and services. We wanted to partner with an eCommerce provider we trusted.”

- Karen Shaffer, Vice President, American Paper and Twine

With Insite's deep integration capabilities to Infor ERPs, companies can quickly bring to market a fully-integrated and feature-rich eCommerce site with minimal effort.

Key Benefits of InsiteCommerce

- Integration into your ERP and other backend systems
- Tailored product information capabilities to build and manage your product catalog
- Intuitive CMS capabilities to deliver seamless user experiences across web and mobile devices
- Powerful digital commerce core engineered to manage complex B2B business requirements right out-of-the-box
- Deployed in a flexible and scalable cloud environment

Infor Has Met its eCommerce Match

Success In Their Words

Wholesale Distributor Running Infor SX.e

“With Insite, we are able to focus on what we do, servicing our customers, knowing that they have their eye on what's next. The Insite roadmap is strong.”

- Coburn Flannery, Director of eBusiness, The Granite Group

Manufacturer Running Infor Visual

“If the customer wants to do research on a product online, but place a fax order because that's what his system generates, great. We want to work with our customers to deliver the experiences they want and Insite helps us achieve that.”

- Jim Nerone, Chief Information Officer, Buyers Products
