

InsiteCommerce® Mobile

For the Way People Want to Work

Mobilize Your Business

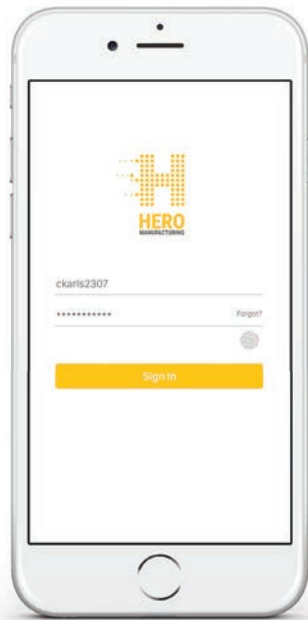

Enable your team and engage your customers where they are with a mobile app experience.

The people of manufacturing and distribution need access to information in a user-friendly, efficient manner. Whether it be scanning a barcode to view product details, checking on the status of a delivery or ordering a part at a job site, InsiteCommerce Mobile App puts the power of commerce in the hands of your users at their moment of relevance.

Beyond Responsive. The Power of Mobile Apps.

Stay connected and get more done, anywhere work happens.

Your
Brand

Brand Association

Mobile Apps put your brand first. Build customer and team loyalty and drive adoption.

Brand Awareness

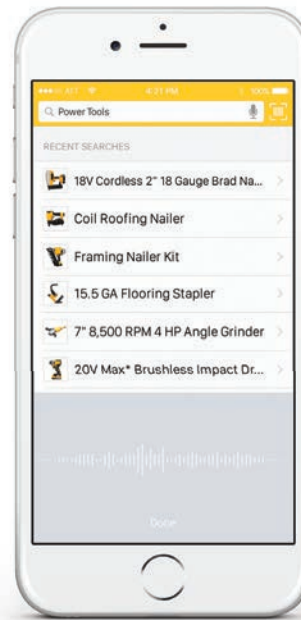

Your logo, colors and images in the hands of your team and customers on the device they use most.

Build Brand Loyalty & User Adoption

Be front and center in your customers minds with your app icon on their home screen, always ready to engage.

Better User Experience

Optimized user experience for greater efficiency and productivity on their mobile device.

Data Personalization

Give people the right data, at the right time, wherever work may take them.

Product Catalog

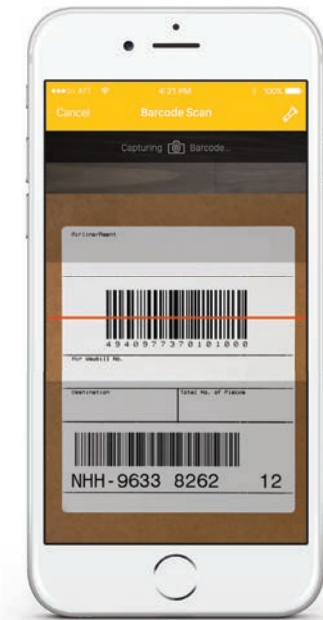

Deliver a user-specific rich product catalog and data experience, optimized for their device.

Relevant Data

Cut through the noise with user-specific data, pricing and product recommendations.

Streamline Efficiency

Access current order status, and quickly reorder the items you need from wherever you may be.

Device Utilization

Connect people to business and make them more productive on the device they use the most.

Better Performance

Leverage the full power of your device, with quick access to information at your fingertips. No more launching browsers and searching for results.

Device Features

Use your device features for tasks such as barcode scanning, speech to text, and finding a local branch.

Enhanced Security

Quickly and securely login using your devices fingerprint reader, no more looking for user names and passwords.

Your Brand. Your App. No Development.

Fully Integrated into InsiteCommerce®. No additional implementation required.

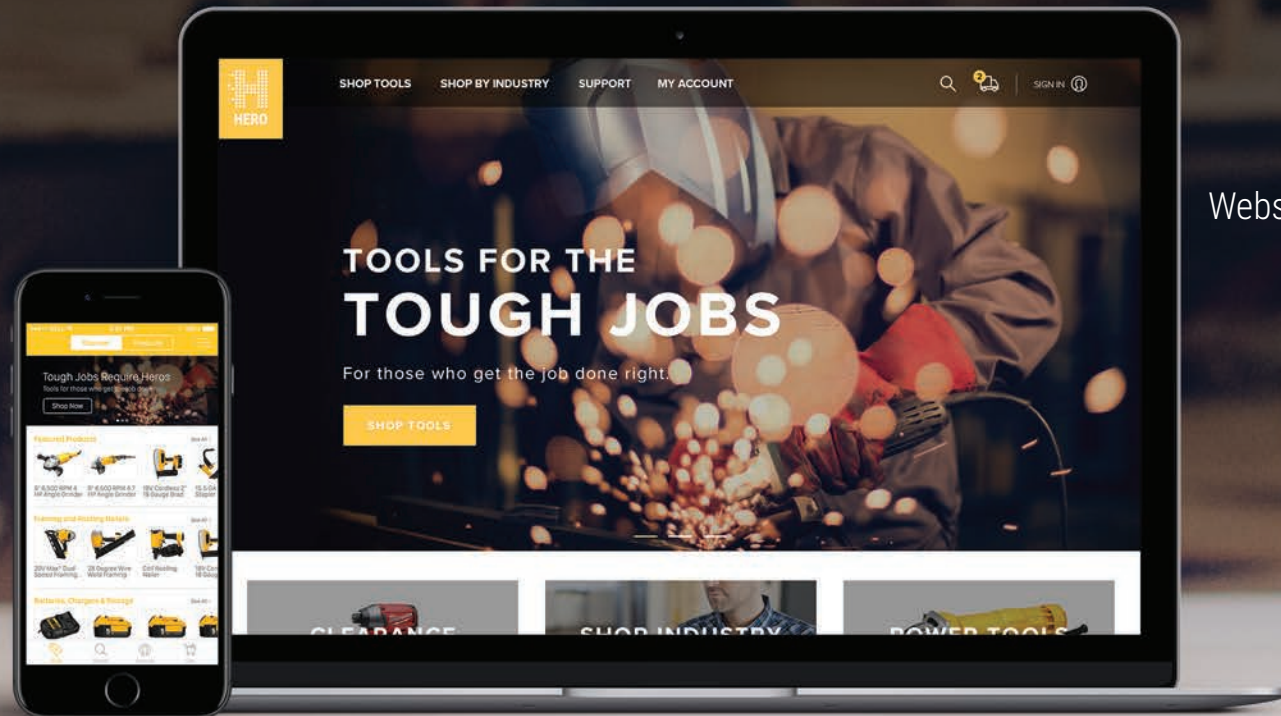

Ready to Use

Leveraging the B2B capabilities of the InsiteCommerce solution, InsiteCommerce Mobile App provides customers with the immediate access to search a product catalog, check order status, and add items to a cart and checkout, without any customizations. No mobile app development required, and no need to manage the app in the App Store, Insite takes care of it all.

Lower Total Cost of Ownership

With the transaction-ready approach of InsiteCommerce Mobile App, companies can avoid the high costs of mobile development while providing their users a stable and consistent experience. Insite eliminates the expensive design, development, and upgrade costs commonly associated with other mobile solutions.
